**INTERNATIONAL SEARCH REPORT**

International application No:

PCT/JP2004/019686

**Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)**

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

**Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)**

This International Searching Authority found multiple inventions in this international application, as follows:

See extra sheet.

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

**Remark on Protest**

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

Continuation of Box No.III of continuation of first sheet(2)

For the inventions of claims to satisfy the requirement of unity of invention, the inventions require a special technical feature linking the inventions so as to form a single general inventive concept. The inventions of claims 1-9 are linked to each other only by the technical matter described in claim 1. However, the technical matter described in claim 1 is widely known as described in each of the below listed documents, and therefore the technical matter is not a special technical feature.

From the above, the inventions of claims 1-9 have no special technical feature for linking the inventions to form a single general inventive concept. Accordingly, it is apparent that the inventions of claims 1-9 do not satisfy the requirement of unity of invention.

Next, the number of inventions is examined. Claims 2, 3, 4, 5, 6, 7, and 8 directly dependent on claim 1 have no common special technical feature.

Claims 1-9 include at least seven inventions even with other claims described in a form of dependent claim excluded.
